EXPERIENCE

Frontend Developer

Memecoin.org

📅 01/2025 - Present   📍 Remote - United States

- Developed and deployed full-scale Web3 platform from scratch using Next.js, handling thousands of daily transactions
- Built decentralized applications (dApps) with seamless smart contract functionality, wallet connectivity, and real-time blockchain data
- Enhanced platform performance achieving significant load time improvements through code optimization and efficient data fetching
- Collaborated on technical architecture for scalable front-end systems with API integrations and responsive design implementation
- Technologies: Next.js, React.js, TypeScript, JavaScript, Web3.js, Smart Contracts, UI/UX Design
- Live Platform: https://www.memecoin.org

Chief Technology Officer

Throu S.A.S

📅 2022 - Present   📍 Remote - Colombia

- Engineered and showcased a secure Web3 investment platform processing significant digital asset transactions with zero security incidents
- Implemented smart contracts and payment flows enabling automated financial operations and multi-wallet integrations
- Managed remote development team of 5 developers across multiple time zones, improving delivery velocity by 20%
- Established technical standards for code quality, security protocols, and scalable infrastructure architecture
- Technologies: Next.js, React.js, Node.js, MongoDB, Smart Contracts, Web3, Security Protocols, UI/UX Design
- Platform: throu.app

Web Developer

Gunny Games

📅 2024   📍 Remote - Colombia

- Created gamified platform with token-based rewards system serving hundreds of active users with blockchain-powered progression
- Boosted platform load speeds by 35% through comprehensive performance audits, code refactoring, and database optimization
- Implemented real-time features including live token updates, user notifications, and dynamic content rendering
- Developed cross-browser compatible interface ensuring consistent user experience across desktop and mobile platforms
- Technologies: Next.js, React.js, Three.js, TypeScript, Node.js, Web3, Performance Optimization, UI/UX Design
- Demo: gunny-games-web.vercel.app

Web Developer

Mango House

📅 2022 - 2023   📍 Remote - Colombia

- Built comprehensive booking platform handling dozens of daily reservations for rooms and vehicles with integrated payment processing
- Developed mobile-first responsive interface achieving high user satisfaction scores and cross-device functionality
- Enhanced booking speed and efficiency by 25% through API optimization, database indexing, and streamlined user workflows
- Integrated multiple third-party services including payment gateways, email notifications, and booking management systems
- Technologies: React.js, Node.js, RESTful APIs, UI/UX Design
- Project archived by client request

PROFESSIONAL SUMMARY

Full-Stack Software Engineer Full-Stack Software Engineer with 5+ years of experience developing scalable web applications and blockchain solutions. Currently leading Web3 platform development at Memecoin.org while serving as CTO at Throu S.A.S, managing cross-functional teams and delivering high-performance systems. Expert in React ecosystem, smart contract integration, and modern development practices with proven track record of optimizing system performance by 35% and accelerating team delivery by 20%. Trilingual professional fluent in English, Spanish, and Creole.

KEY ACHIEVEMENTS

💎 **Supported Team Delivery**
Increased team delivery by 20% through streamlined processes and effective management.

💎 **Enhanced Platform Performance**
Optimized platform load speed by 35%, enhancing user experience and reducing bounce rates.

💎 **Ensured Platform Security**
Engineered secure platform handling over 100,000 transactions monthly with zero incidents.

💎 **Developed Gamified Platform**
Built gamified app with token rewards, reaching 5% user retention growth in six months.

EXPERIENCE

Unity Developer

La Panquequería

📅 2021 - 2022 📍 Remote - Colombia

- Enhanced brand engagement by 30% through developing a cross-platform mobile app using Unity
- Improved app engagement by 100% by implementing UI/UX design aligned with mobile development best practices
- Collaborated with client stakeholders to deliver custom branded mobile solution
- Technologies: Unity, C#, Mobile Development, UI/UX Design
- Project kept private by client request

EDUCATION

Bachelor of Science in Systems Engineering

Universidad de Medellín

📅 09/2025 📍 Colombia

- (Candidate)
- Universidad de Medellín, Colombia
- Expected Graduation: September 2025
- Relevant Coursework: Data Structures & Algorithms, Database Design, Software Architecture, Distributed Systems
