Portfolio Website: Edward Bowie

FULL-STACK SOFTWARE DEVELOPER

Highly motivated and innovative Full-Stack Software Developer with 4 years of experience in designing and implementing complex software solutions. Passionate about creating high-performance, scalable applications by efficiently implementing modern technologies like Next.js, TypeScript, and Web3. Proven track record in optimizing codebases, developing seamless user experiences, and leading cross-functional teams. Adaptable to different industries, from gaming to investments, with a constant focus on delivering impactful results.

Areas of expertise include:

- ❏ Full-stack development
- ❏ API integration & optimization
- ❏ Blockchain/Web3 applications
- ❏ Cross-functional team collaboration
- ❏ Scalable architecture design
- ❏ Problem-solving & debugging
- ❏ Mobile responsiveness & UI/UX

PROFESSIONAL EXPERIENCE

Gunny Games   2024
Web developer

Recruited to modernize and optimize the company's website by transitioning from React to Next.js. Leveraged technologies like TypeScript, Three.js, and GSAP to create stunning visual elements and enhance the overall user experience.

Key contributions:

- **Designed and developed** a new platform from the ground up, enhancing user experience and site speed.

- **Integrated API calls** to display up-to-date blockchain information, improving the platform's functionality.

Throu Investments startup   2023 - present
Software developer

Developed a highly secure and scalable investment platform architecture, integrating Web3 functionalities to facilitate secure and efficient transactions.

Key contributions:

- **Led the design and development** of a robust platform architecture for Web3 investment transactions.
- **Integrated Web3 functionalities** for enhanced security and efficient management of investment processes.
- **Collaborated with a cross-functional team**, ensuring smooth deployment and successful project milestones.

Mango House   2022 - 2023
Web developer

Built a user-friendly appointment scheduling platform for a rental agency in San Andrés, Colombia, enabling real-time bookings for rooms and vehicles.

Key contributions:

- **Designed and implemented** an intuitive booking interface, resulting in improved customer satisfaction and engagement.
- **Developed backend services** for real-time booking and scheduling, boosting operational efficiency.
- **Ensured mobile responsiveness** and cross-browser compatibility, making the platform accessible on various devices.

Note: This client has taken down their website.

Unity developer

Developed a mobile application aimed at increasing customer engagement and enhancing interaction with the company's services.

Key contributions:

- **Designed and developed** the application from concept to deployment, incorporating user feedback to refine features.
- **Implemented interactive features** that significantly boosted customer engagement and retention.
- **Collaborated with team members**, ensuring the continuous integration of features and updates.

EDUCATION

System Engineer Undergraduate Candidate
Anticipated Completion: December 2025
Universidad de Medellín, Colombia

TECHNICAL PROFICIENCIES

Frontend:

- Next.js, React, HTML, CSS, SCSS, Vite

State Management:

- Zustand, React Query, React Context

Backend:

- Express, Node.js, WebSockets

Databases:

- MongoDB, MySQL

Languages:

- TypeScript, C#, Java, JavaScript

DevOps:

- Azure, RESTful web services

Other Tools:

- Android Studio, Unity, Adobe XD, Adobe After Effects, Three.js, GSAP, Bun, UX/UI Design

---

CERTIFICATIONS & ADDITIONAL COURSES

- Introduction to Blockchain Development – Coursera, 2024
- Advanced JavaScript Techniques – Udemy, 2023
- Cloud Development with AWS – edX, 2022

PROJECTS & PORTFOLIO
